Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. You are about to learn how to start writing code in python just like some of the top programmers at YouTube, Facebook, Dropbox, Reddit, Uber and many others! There is a reason why python has grown so rapidly since the first version was released in 1989 to become the language of the year in 2018! There is a reason it is the most taught first language at universities around the world, the most preferred language in scripting, most preferred language in AI programming and the most preferred in writing system tests! Python is also a leading language in scientific computing, graphics designing, and web development!Indeed, Python is big and is perhaps destined to become bigger as more and more programmers and tech companies continue adopting python!Perhaps the reason for its rapid adoption may be because of its ease of use, simple syntax that allow small lines of code, its dynamic nature, and its general utility. It could also be because of its ability to support various internet protocols like FTP, IMAP, XML, JSON, HTML and many others as well as its ability to support various operations like NLP, data scrapping and various other applications of machine learning!Whatever the reason is, more and more students and tutors are preferring python as their first programming language! This means Python is increasingly becoming the one language that everyone should start learning!And if you are excited to start dipping your feet into the world of programming, you can't go wrong by committing to learn python!Lucky for you, this book is a complete beginners' guide to python 3 programming to help you get started with python to a point where you can write simple code to solve everyday problems! And if you...
